NICARAGUA/
CIA

SCHIEFFER: U.S. government sources confirm tonight that the Central Intelligence Agency is actively directing the mining of Nicaraguan harbors. It had been thought that anti-Sandinista rebels were responsible, but the government sources say that these rebels are not doing the mine laying. The nationality of just who is is not known, but the CIA has a freighter off Nicaragua's coast. And boats are lowered from it to take the mines into the harbors.
